Dear Steven,

NATIONAL ARBORETUM CANBERRA - VISITOR CENTRE

I am writing to thank Stone Mad for the high quality work on our building. This is a high profile building in a prominent position in Canberra and it is already attracting a lot of public interest.

Visitors entering the building gain a first impression from the stone walls, which frame the entries. The impact of the very pleasing stonework has been commented upon by all visitors to the job. Early in the project, you worked closely with us to test samples of styles and jointing, which enabled the design team to settle on the current method.

The Stone Mad team clearly has pride in their work and has produced only first class work.

I appreciate the easy working relationship with you and your team, who have an obvious willingness to cooperate. Stone Mad has been flexible when we needed it and responsive when we needed work done quickly.

Our financial dealings have been open and honest so there has been no conflict and we have a sound understanding of the costs and progress claims.

The mason's role in this building is highly important and for this reason, I hope Stone Mad will share my pride in the building.

Yours sincerely,

PROJECT COORDINATION (AUSTRALIA) PTY LTD
